Accountants' role in helping protect the planet spotlighted at CAPA and CA Sri Lanka's Accounting Asse  
The role of accountants in helping protect the planet is a topic that has gained significant attention in recent years. This is due to the growing awareness of the impact of climate change and the need for sustainable business practices. Accountants are in a unique position to help businesses and individuals make informed decisions about their environmental footprint. They can provide valuable insights into the financial implications of sustainable practices and help organizations develop strategies to reduce their carbon footprint. This is a role that is becoming increasingly important as the world moves towards a more sustainable future.
